System Description

- Made-to-measure, top-hung movable wall system manufactured to suit project requirements.

Method of Operation

- Individually operated panels with mechanical sealing system and removable operating handle.
- Spring-loaded top and bottom seals providing effective acoustic separation.

Acoustic Performance

- Minimum laboratory sound reduction performance: Non-acoustic glazed partition.
- Tested in accordance with applicable acoustic standards and manufacturer certification.

Finishes

- Laminate, melamine, glass or powder-coated finishes as selected by the Architect from the manufacturer's standard range.

Structural Requirements

- Head track to be fixed to suitably designed structural steelwork or reinforced concrete and approved by the project structural engineer.
- Void depth: _____ mm.

Optional Features

- Pass doors, acoustic baffles, specialist finishes and bespoke stacking arrangements available where applicable.

Installation & Warranty

- Supply and installation by AM WALLS LTD specialist installation engineers in accordance with manufacturer recommendations.
- Manufacturer's warranty and planned preventative maintenance packages available.
